Color Wax

Tarrago Color Wax Bar provides a perfect finish by removing the last traces of work that has been done on smooth leather and synthetic leather shoes, soles and heels.

Surfaces

Use

Description

Tarrago Color Wax Bar provides a perfect finish by removing the last traces of work that has been done on smooth leather and synthetic leather shoes, soles and shoe heels. It renews the color and makes the small cuts in heels or soles invisible. Color wax is a mixture of synthetic waxes that are poured into triangular rods using high-quality organic and inorganic dyes. It provides a glossy finish.

Colors

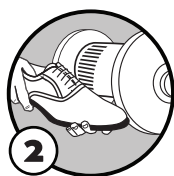

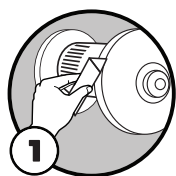

06 - Dark Brown, 18 - Black

| 140g / 4.94oz | 10 | 17,7 x 13,3 x 9,5 | 1,51 | 240 | 8427457473188 (Black) |

How to use

Polishing machine:

1. Support the wax on the brush of the mechanical roller of the polishing machine.
2. Bring the shoe or the sole of the shoe closer to the polishing wheel.
3. Stop until desired shining is obtained.

Tips

- The hardness of the wax has been adjusted to allow easy and unproblematic application with modern finishers: no smearing or spilling.
- The shoe should be pressed against the brush/disk firmly at first and then a little softer. This ensures an optimized shine/brilliance of the polish.
- Use different speeds to obtain different results such as: polishing, burned effects, etc.
- We recommend the Tarrago Filling Paste for scratches or cuts on the leather of the shoe.
- For a better use, you can melt the wax on the brush of the mechanical roller of the polishing machine.
