CARNAUBA WAX

— Description

Shoe Polish with a high concentration of pigments that provides a great coverage capacity for smooth leather footwear and garments.

Wax and solvent based formula that contains three types of natural waxes:

- Beeswax to nourish and soften the leather.
- Carnauba wax which provides a long-lasting shine and ensures waterproof protection.
- Mineral waxes provide shine, help waterproof and protect the leather.

Tin 100 ml.	12	19,5 x 19 x 10 cm	1.55 kg	3744	

CUSTOMS CODE	NET WEIGHT	GROSS WEIGHT	VOLUM
3405100000	0,075	0,039	113,411 cm3
	0,130	0,074	233,832 cm3

— How to use

1. Remove any dust from the surface with a brush.
2. Spread a layer of polish paste over the area of the shoe to be shined with a shoe duster or dauber brush.
3. Let dry for 10 minutes.
4. Get the shine you want with a shoe duster or horse hair wooden brush.

— Tips

- We recommend following the “Spit Shine” technique to obtain high shine effect:
 1. If you desire a higher-gloss shine, continue to apply tiny amounts of shoe polish using a shoe duster.
 2. Allow to dry.
 3. Then with a tiny drop of water, continue to buff the dried wax polish until the clouding disappears and a high-gloss shine emerges. Several applications will be required.
 4. When the shoe is highly glossed, use a clean dry soft cloth or a shining brush to give it a final buff.
- The Tarrago Shoe Polish does not contain Silicone.
- If you wear your shoes frequently (3 or more times for week), we recommend you get a basic shine at least every 1-2 weeks.
- The colors of the shoe polish are the same as the Tarrago Self Shine Color Dye.
- The shoe polish is a solid paste, so it may suffer some cracking over time or the blows caused by its use. However, its formulation maintains a perfect balance of stability between 45 °C and -18 °C.
